Alvaro Langa Junior

Computer Science student seeking a long-term working student role in software development and automation. Hands-on experience building Python and Flask applications, integrating REST APIs, and designing SQL databases, with all work version-controlled in Git. Comfortable across backend logic, API integration and front-end UI, and used to documenting code and working through issues in Jira. Brings a customer-facing background, which is useful for service desk and process work.

Projects

Lyric Analysis Web Application (LaMusica) · GitHub ↗ · 2026

- Built a Flask application that pulls data from an external REST API, processes it in Python and presents the results as interactive Chart.js visualisations.
- Designed the data flow from API request to processing to storage to UI, with error handling for failed or malformed API responses.
- Structured debugging and logging workflows to trace and fix issues across backend and front end.
- **Technologies:** Python, Flask, REST API, JavaScript, Chart.js

Ouro Bank · GitHub ↗ · 2026

- Built a banking application covering account creation, transactions, transfers and interest calculation.
- Applied object-oriented architecture (inheritance, encapsulation) and validated all inputs with exception handling.
- Persisted data to CSV files, which meant designing a simple, consistent data structure.
- **Technologies:** Java, OOP

Work Experience

Krämer Marktforschung GmbH
Customer Service
April 2024-July 2024

- Handled customer interviews and support requests in English and Portuguese, following structured processes and data-collection standards.
- Recorded interaction data accurately and consistently, which is the foundation of reliable reporting.
- Identified recurring issues and adapted communication to resolve them efficiently.

Educational Background

BSc Computer Science

GISMA University of Applied Sciences
September 2023 - April 2027

- Specialization in Computer Science

Skills

Tools/Technologies

Languages:
- Python, Java, JavaScript

Backend & APIs:
- Flask, Node.js, Express
- REST APIs

Web:
- HTML/CSS, EJS, Chart.js

Databases:
- SQL, SQLite, MongoDB

Tools:
- Git, GitHub, Jira

Operating Systems:
- Windows, macOS

Languages

- English - Fluent
- Portuguese - Native
- German - Basic (A2.1)

Certification

- Level Up Cybersecurity with Generative AI - **IBM**

Relevant Modules

- Databases & SQL
- Software Engineering
- Web Development
- Programming in Python

Additional Information

- Berlin resident
- Available immediately
- Interests: Open source coding, technology meetups.
